

# Learning with Meaning Inc.

## A Holistic Approach to Education

eNDVR Homeschool Enrichment Program | Aspire Middle and High School | Makerspace | Summer Camps

Learning with Meaning has been supporting home school families since our inception in 2015. We offer classes through eNDVR, our homeschool enrichment program, for grades K-5. We offer an online curriculum for homeschool families through an all-online curriculum program called Century Tech, and students can either enroll full-time or part-time in our fully accredited private school for grades 6-12: Aspire. We also offer a resource library, a Makerspace, and awesome summer camps for all ages.

### eNDVR Homeschool Enrichment Program

eNDVR offers classes in outdoor education through our Forest School and Naturalist Skills School programs. We also offer courses in STEM, art, writing, reading, and more. Head to our website to register for great classes like: Explore Missoula Parks, All About Picnics, Story Making, Sewing and Crafting, and many more!

### Aspire Middle and High School

Aspire Middle and High School offers part-time or full-time enrollment for all families. Homeschool families can enroll in select experiential courses in film production, robotics, culinary arts, and outdoor education. We also offer an online curriculum program for courses in Science, English, and Math through an online learning platform called Century Tech. Aspire is a great space for homeschoolers to interact with their peers in a place that respects the community and works to be flexible with families.

Our **Makerspace** is open to families, for a fee, to use our many printers and machines to build and create!

Our Summer Camps are open to all families and are a great space to learn about technology in our Innovate camps and Naturalist Skills in our Outdoor Camps!
